

# ParaZYME

## PRODUCT INFORMATION

### WHAT IS PARAZYME?

ParaZYME is a comprehensive enzyme formula that contains Betaine Hydrochloride (HCl).

### HOW IT WORKS

Hydrochloric acid (HCl), commonly known as stomach acid, is the body's first line of defence against organisms entering the body via food (i.e. parasites and bacteria). If HCl production is low, than parasites will be able to bypass the stomach and enter the rest of the digestive system.

ParaZYME can be used daily to ensure that the intestinal environment is not conducive to parasite infestation. It is a great preventative supplement, for those traveling to countries where parasites are common (i.e. the tropics).

ParaZYME also contains digestive enzymes, which work to break down food into their usable components. The body makes digestive enzymes, however many people do not produce enough. This means they are unable to absorb all of the nutrients from the food they are eating. If undigested food reaches the large intestine, it creates an environment that supports parasites and other unwanted bacteria. Parasites, along with the toxins they create, cause damage to the intestinal tract lining. This lining is responsible for creating a barrier, and if it is compromised, will allow for unwanted absorption of material into the bloodstream. This can lead to allergies, food sensitivities and auto-intoxication. It is important to rebuild the digestive tract lining with nutrients such as L-Glutamine and N-Acetyl D-Glucosamine.

### DIRECTIONS FOR USE

Take one capsule with each average size meal. This can be increased to 2 capsules for a large meal or a meal that is high in fat, carbohydrates or proteins.

### WHAT TO EXPECT

ParaZYME works to weaken existing parasites as well as prevent parasite infestation on an ongoing basis. As the parasite problem becomes under control, more energy and vitality may be felt, as well as reduced symptoms of indigestion. As the parasite problem becomes controlled and eventually eliminated, more energy and vitality may be felt. There may also be reduced symptoms of indigestion, and in some cases, more energy may be felt as more nutrients are absorbed.

### SUPPORT PRODUCTS

*If the patient currently has parasites it is strongly suggested that the following products be taken along with ParaZYME to ensure parasites are destroyed and removed from the body.*

**Parasite Therapy:** is a patented 15 day broad spectrum anti-parasitic, anti-fungal and anti-microbial cleansing program. It is specifically formulated to eradicate parasites and microbial type organisms from the body.

**FibreMAX:** is a blend of both soluble and insoluble fibre at a roughly 50-50 ratio. This ratio works to help absorb dead parasitic materials and bring them to the colon for elimination.

# INGREDIENTS

## PARAZYME

ParaZYME contains a mixture of enzymes, herbs, and supplemental ingredients which work to produce an unfavourable environment for parasites, while helping to digest food more effectively:

Creates an unfavourable environment for parasites:

- ♦ **Betaine Hydrochloride** - a component of stomach acid. It destroys parasites ingested with food before they can take up residence in the rest of the body.

Enzymes that break down proteins:

- ♦ **Protease** - breaks down proteins into amino acids.
- ♦ **Papain** - contains protease, an enzyme which breaks down protein.
- ♦ **Pepsin** - breaks down proteins into amino acid chains.
- ♦ **Betaine Hydrochloride** - breaks down protein into amino acid chains.

Enzymes that break down carbohydrates and sugars:

- ♦ **Amylase** - breaks down carbohydrates into simple sugars.
- ♦ **Lactase** - breaks down lactose (found in dairy, many people lack the lactase enzyme).
- ♦ **Invertase (Sucrase)** - breaks down sucrose (found in table sugar and maple sugar).
- ♦ **Malt Diatase** - breaks malt sugar (found in beer, crackers and cereals).

Enzyme that breaks down fats:

- ♦ **Lipase** - breaks down fat.

Enzyme that breaks down fibres:

- ♦ **Cellulase** - breaks down cellulose (plant cell walls/fibre).

Enzymes that break down phytic acid:

- ♦ **Pectinase (with Phytase)** - breaks down phytic acid.
- ♦ **Phytase** - breaks down phytic acid (found in grains, beans and seeds).

Helps to heal the intestinal tract lining:

- ♦ **Bromelain** - enzyme from pineapple, which reduces tissue irritation and has anti-inflammatory properties.
- ♦ **L-Glutamine** - increases intestinal villous height, stimulates mucosal cell growth in the intestinal tract, and helps to maintain the mucosal cell integrity.
- ♦ **Gamma Oryzanol** - enhances gastric & ileal movement.
- ♦ **N-Acetyl-Glucosamine** - required for tissue repair mechanisms.

## ParaZYME - Each capsule contains

Betaine Hydrochloride	350mg
L-Glutamine	250mg
Gamma Oryzanol	50mg
N-Acetyl-Glucosamine	50mg
Plant Enzyme Blend	45.5mg
Amylase 417 SKB	
Protease 2083 HUT	
Lipase 17 LU	
Lactase 58 LacU	
Cellulase 167 CU	
Invertase 50 SU	
Malt Diatase 2 DP	
Pectinase 6 ADJU	
Phytase 2 U	
Bromelain (2400 gdu/gm)	
Papain (70 mcu/gm)	
Pepsin (1:3000)	35mg

**Other Ingredients:** Vegetable Capsules

**Excipients:** None

Contains no dairy, wheat, gluten, corn, yeast, additives or preservatives.

**Warning:** Discontinue use if abdominal pain, nausea or vomiting occurs unless directed by a physician. Do not use if pregnant, nursing, or after recent surgery. Do not use if gastritis, gastric or duodenal ulcer are present. Do not exceed recommended dose. Keep out of reach of children.
